A Member of the BSI Group of Companies.

## QUALITY POLICY STATEMENT

Successful management of quality is considered to be of prime importance to our business, and is a core principle in driving the operational excellence of what we at Walls Construction do. We are committed to sharing our thinking inside and outside our company and harnessing the capabilities of our people, sub-contractors and suppliers to ensure quality delivery to our customers.

We define quality as meeting customer requirements every time. We will identify and understand these requirements and focus on perfect execution throughout the project lifecycle so that our standards for managing quality will ensure that:

- designs clearly evidence that they fully meet all customer requirements
- robust quality planning enables works to be performed in a systematic, safe and coordinated manner
- processes, materials and workmanship deliver a quality finished product
- inspection and testing supports a 'right first time' culture, reducing defects and re-work.

Delivering our quality requirements will be achieved by

- engaging with our customers, designers, sub-contractors and suppliers
- identifying and working in compliance with applicable legislation, company directives, relevant codes of practice, accepted industry standards and customer requirements
- ensuring our management teams supports our 'right first time' culture
- embedding a quality culture which allows our people to take pride in their work and to fulfil their potential
- harnessing all the Walls Construction capabilities and delivering at project level
- driving continuous improvement through the adoption of innovation and best practice
- establishing, implementing, and reviewing company objectives to drive continual process improvement.

Responsibility for this Policy ultimately lies with the Managing Director of Walls Construction. Day to day implementation of the Policy is the responsibility of operational management and functional heads with the EHSQ Manager and assigned Quality Advisors responsible for the provision of specialist quality support. All employees have a responsibility to comply with this Policy and its associated arrangements.

Arrangements for the control of Quality are contained within the Quality Management System, which fully satisfies the requirements of ISO 9001. The effectiveness of these arrangements and our performance against Company objectives is routinely monitored and reported to the Company Quality Leadership Team. This Policy aligns with other Walls Construction Policies and will be reviewed annually as a minimum. This Policy will be brought to the attention of all employees, Sub-contractors, suppliers and other persons working on behalf of the Company.

Eugene O'Shea  
Managing Director
